Overview Services & References

rocket media communications, whose innovative concept is setting new standards in the world of global communication, is the world's first TV communications agency which develops customized television formats for their clients and then ensures that these are distributed to almost every television broadcaster around the world. Diverse information, strategic messages and customer products and brands are packaged as interesting stories within TV documentaries, reports or news formats. The journalistic workup ensures strong credibility, whilst the link to global economic, cultural and social themes generates international relevance.

The entry gate to effective, value-for-money public relations lies in the refined TV formats being supplied free of charge to TV-channels, which results in massive broadcast rates. Although the customer covers the production and distribution costs, the pay-off is a guaranteed global or specifically targeted audience of millions, or even billions, at a comparatively low cost.

The image movies and documentaries produced before, during and after the 'Asian Winter Games 2011' were shown on a total of 690 TV channels worldwide, including the BBC, euronews, CNN, Eurosport, Asia News International, Russia Today TV, CCTV, Reuters etc.

rocket media communications successfully realized the world-wide media communication for following Projects, among others:

- Asian Winter Games 2011 | Astana Economic Forum 2012 + 2013
- The Atom Project 2012 | Energy Globe - The World Award for Sustainability 2002-2016
- Tourism Board of Austria, Germany, Kazakhstan, Russia, Switzerland, Tajikistan & Uzbekistan.
- Various TV-advertising & PR-projects for our clients.
